Specification

The disclosure is objected to because of the following informalities: the specification should not refer to claims (the first paragraph). Appropriate correction is required.

Claim Objections

Claims 1-4 are objected to because of the following informalities: in claim 1, line 4, there is no antecedent basis for the direction of insertion and in lines 3 and 6, the “means” is lacking function; in claim 2, there is no antecedent for the smallest outer diameter and also there is no antecedent basis for the portion of widened cross-section and since the cross section widens it does not have a fixed size with which to compare the covering. In general, the claims include informalities which appear to be associated with their translation for a foreign language. Applicant should review all the claims to ensure they comply with current US standards. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Froehlich (US 4,983,083). Froehlich discloses a fixing device comprising an anchoring bolt (4)

having an fixing means (5) and a widening anchoring zone (8); a covering (9) made of silicone-containing plastic ("polysiloxan" column 3, line 11), smaller than the widening anchoring zone and; a curable composition (3).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
